LACMA Olmec: Colossal Masterworks of Ancient Mexico

Opening October 2010.

Olmec is the first West Coast presentation of colossal works and small-scale sculptures produced by Mexico’s earliest civilization, which began around 1400 BC and was centered in the Gulf Coast states of Veracruz and Tabasco. Olmec architects and artists produced the earliest monumental structures and sculptures on the North American continent, including enormous basalt portrait heads weighing up to twenty-four tons, of their rulers.

Small-scale jadeite objects, which embody the symbolism of sacred and secular authority among the Olmec, attest to the long-distance exchange of rare resources that existed as early as 1000 BC, and Olmec artists were unsurpassed in their ability to work this extremely hard stone with elementary tools of chert, water, and sand. The exhibition is organized by Mexico’s Instituto Nacional de Antropología e Historia, LACMA, and the Fine Arts Museums of San Francisco, and is curated at LACMA by Virginia Fields, senior curator of Art of the Ancient Americas.
