The U.S. Census Bureau reports three million foreign-born blacks in America. With growing black immigrant populations; from Somalis in Minnesota, to Dominicans in New York, to Haitians in Miami, to Nigerians in Texas; the very term "African-American" has become contentious. Is it based on race, ethnicity, looks, citizenship, geography, history, culture or some other criteria? Employers, schools and government agencies are debating how they classify and serve black immigrants. Through interviews with social scientists, activists, and members of immigrant groups, THE NEO-AFRICAN-AMERICANS captures the major issues arising from black immigration: ethnic labeling, education, culture, black-on-black tensions, and affirmative action, among others.

More than 60 screenings nationwide, including universities, community groups, government agencies and the Library of Congress
